PRAKASH CHAND SHARMA

SYSTEMS ENGINEER

+91 9756802502 pikugee99@gmail.com LinkedIn

To leverage deep expertise in quality assurance, process optimization, and cross-functional collaboration to enhance product reliability, streamline workflow and deliver exceptional user experiences. Committed to driving continuous improvement, implementing effective testing strategies, and translating complex challenges into actionable solutions that align with organizational goals and client expectations.

Education

2022: MS / M.Sc. (Science), Computers, Maharishi Dayanand University (MDU), Rohtak

2019: BCA, Computers, Maharishi Dayanand University (MDU), Rohtak

Core Competencies

- Quality Assurance (QA) Automation
- Manual & Functional Testing
- Regression & System Integration Testing (SIT)
- Defect Tracking & Test Case Management
- Selenium with Java
- JIRA & Zephyr Test Management
- Process Optimization & Continuous Improvement
- UI / User Experience Testing
- Application Performance & Reliability Analysis
- Cross-Functional Collaboration

Certifications

Microsoft GitHub Foundations

Microsoft GitHub Copilot Certification

Profile Summary

- **Gained nearly 4 years of experience in driving quality excellence by executing end-to-end QA processes,** ensuring robust product reliability and delivering seamless user experiences across complex applications.
- **Currently working as a Systems Engineer at Infosys Limited,** driving end-to-end quality assurance, process optimization, and defect management to ensure high product reliability and seamless user experience across complex applications.
- **Optimized process efficiency** through strategic automation, regression, and functional testing, resulting in measurable enhancements in system performance.
- **Translated business requirements into actionable test strategies**, leveraging expertise in test case design, defect tracking, and coverage analysis.
- **Collaborated cross-functionally** with development, operations, and client teams to proactively identify, troubleshoot, and resolve critical issues.
- **Possess excellent problem-solving, communication, and time-management skills**, enabling effective collaboration across teams, timely resolution of critical issues, and delivery of high-quality solutions.

Work Experience

Systems Engineer | Infosys Limited | Mumbai |Apr 2022 - Present

Key Roles and Responsibilities:

- Driving end-to-end quality assurance automation using Selenium with Java, enhancing testing efficiency and reducing manual effort.
- Executing comprehensive manual and functional testing to ensure application reliability, accuracy, and compliance with business requirements.
- Orchestrating regression and System Integration Testing (SIT) to validate seamless functionality across multiple modules and platforms.
- Managing defect tracking and test case lifecycle via JIRA and Zephyr, streamlining issue resolution and improving test coverage.
- Collaborating with cross-functional teams to align QA processes with development, product, and operations strategies for seamless delivery.
- Optimizing QA processes and driving continuous improvement initiatives to enhance productivity, reduce cycle time, and improve software quality.
- Analyzing application performance and user experience metrics, identifying bottlenecks, and ensuring high reliability and superior end-user satisfaction.

Key Highlights:

- Designed and implemented scalable system solutions, improving operational efficiency by 20% through automation and process optimization.
- Collaborated with cross-functional teams to troubleshoot and resolve technical issues, reducing system downtime by 15% and enhancing service reliability.
- Analyzed system performance metrics and driving continuous improvement initiatives, achieving a 10% boost in application responsiveness and user satisfaction.

Technical Skills

- **Testing Skills:** Manual Testing, Functional Testing, Regression Testing, System Integration Testing (SIT), User Acceptance Testing (UAT) Support, Test Case Design & Execution, Test Design & Execution, MongoDB
- **Test Management Tools:** Zephyr, JIRA
- **Defect & Quality Management:** Defect Tracking & Reporting
- **Database & Validation Skills:** SQL (Data Validation & Queries)
- **Automation Skills:** Selenium, TestNG, Cucumber, Java (for Automation)

Projects

Trade and Operations Processing System (TOPS)

- Performed comprehensive Manual and Automation testing for TOPS, a trading web application, including end-to-end UI validation to ensure seamless functionality and optimal user experience.
- Designed, automated, and executed detailed test scenarios based on business requirements to validate system accuracy, performance, and workflow integrity.
- Identified, documented, and tracked defects through systematic manual and automated test executions, contributing to enhanced application stability, reliability, and compliance.

LIC Sales Super Saathi

- Executed comprehensive test cases during System Integration Testing (SIT) to validate end-to-end system functionality.
- Provided on-site support during User Acceptance Testing (UAT) at the client location, ensuring smooth test execution and timely issue resolution.
- Managed and tracked defects efficiently using JIRA, contributing to improved turnaround times and enhanced product quality.
- Monitored overall test progress and maintained detailed test cases using the Zephyr test management tool.

Personal Details

Date of Birth: 4th Februray, 1999
Languages Known: English & Hindi
Address: Faridabad
